

LADY BELMOR

39.6m (129'11") CRN

LOA: 39.6m (129'11")
Beam: 7.7m (25'3")
Draft: Max 2.4m (7'10")
Speed: 14 knots @1420 rpm / 21
knots @2030 rpm
Location: France

Year: Mfg-2009 Model-2008
Mfg: CRN
Type: Motor Yacht
Fly Bridge with Cockpit
Price: 12,750,000 EUR

Additional Specifications For lady belmor:

LOA:	39.6m (129'11")	Year:	Mfg-2009 Model-2008
Mfg. Length:		Mfg:	CRN
Beam:	7.7m (25'3")	Model:	
Draft:	Max 2.4m (7'10")	Type:	Motor Yacht
Hull Mtrl:	GRP		Fly Bridge with Cockpit
Hull Cnfg.:	Semi-Displacement	Top:	With Flybridge
Hull Designer:	CRN Engineering		Enclosed
Deck Mtrl:	Teak Over Fiberglass	Speed:	14 knots @1420 rpm / 21 knots @2030 rpm
Disp:	235kg (518.1)	Engines:	2xMTU
Range:	1000		12v4000 M90
Int Designer:	Zucon International Project		2525 HP , 628 hrs
Ext Designer:		Engines Year:	2008
Fuel Cap:	25200 l (6657.8 g)	Staterooms:	5
Water Cap:	5000 l (1321 g)	Sleeps:	12
Holding Tank:		Heads:	5
Flag:	malta	Crew Quarters:	1
Classifications:	American Bureau of Shipping	Crew Berths:	7
Class Type:		Captain Cabin:	No
MCA:	Yes	Price:	12,750,000 EUR
ISM:			
Location:	France		

Accommodations

Master Cabins on main deck Number of Cabins: 5 Total Guests (Sleeping): 12 Total Guests (Cruising): 12 Cabins configuration: 3 Double, 2 Twin Beds configuration: 2 Pullman, 3 Queen, 2 Single Number of crew: 7 Guest Accommodation: 1 master cabin with king size bed 2 vip cabins with double bed 2 Twin cabins with 1 pullman in each cabin Max 10 adults + 2 kids. --- General description The area designated for VIPs and guests are as shown on the General plans and are located on lower, main and upper decks. Curtains, bedspreads, carpets, leather and marble will be chosen by the Owner from the collection available in the shipyard. If any item(s) is mentioned elsewhere in this specification, it is to be understood that the item(s) will be supplied and/or equipped only once. Lower deck The following furniture will be fitted in each area: VIP Cabin • double bed with mattress, pillows and bedspread • ventilation under the mattress • drawers under the bed • walk in wardrobe • safe • two-seater sofa on side • big size porthole with manual curtains • dressing table with pouff • mirrors on internal door side • carpet floors • walls in wood and leather • ceilings in wood and leather VIP Bathrooms • cupboards

and shelves • n. 2 washbasins • marble surface around the washbasins • marble flooring • mirrors • whirlpool bath with multifunctional shower and lacquered walls • vacuum WC and bidet in separate room • porthole with manual curtains • bathroom accessories • walls in wood • lacquered ceilings Guest Cabins • two single beds with mattress, pillows and bedspread • ventilation under the mattress • drawers under the bed • bedside tables • writing - desk with pouff • dressing room with wardrobe • big size porthole with manual curtains • mirrors • carpet • ceilings in wood and leather • pullman bed with mattress and bedspread Guest Bathrooms • cupboards and shelves • washbasin • marble surface around the washbasin • marble flooring • mirror • shower • vacuum WC and bidet in separate room with glazed sliding door • porthole with manual curtains • bathroom accessories • walls in lacquered wood • lacquered ceilings Lobby Lower deck Access from the stairs from the lobby on main deck and give access to the VIP s and guest s cabins. In the access to guest s cabin there are two sliding waterticht doors. • Cupboard • Walls in wood and leather with mirrors • Carpet flooring • Ceilings in leather Main deck / Main Salon Access to the main salon is from the main deck cockpit through one two glazed leaf sliding door and from the dining room via two glazed sliding doors electrically operated. One stair on portside give access to the upper salon. The main salon is equipped with the following items: • electrically operated stem stainless steel and glass sliding doors • curtains for stem sliding door electrically operated • n. 2 facing three-seater sofas on sides • n. 2 armchairs • n. 2 padded armchairs • n. 2 low smoking table • walls in wood and wooden cupboard • lined ceiling in wood and leather • window with electrically operated curtains • carpeted flooring Dining Room • access door from the lobby • rectangular glass table (10 places) with wood support • n. 10 chairs • cupboards with door and drawers • service door for access to the pantry • windows with electric curtains • carpeted flooring • ceilings in wood and leather Lobby • electrically operated water tight door from external starboard walking • door to the owner s suite • manual sliding door to the dining room • manual sliding door to the galley • carpeted flooring • walls in wood • ceilings in leather Main Deck Head • washbasin with unit and shelving • washbasin surround in marble • mirror • vacuum WC • bathroom accessories

Audio And Visual Equipment

Latest entertainment system throughout the yacht, with internet, plasma tv, dvd players, ipod stations etc.

Deck Equipment

6 mt Tender for guests 4 mt tender for crew 2 Jetskis Yamaha vx110 (2009) Snorkeling equipment Banana Donut Waterskis Wakeboard

Electrical System

• Main power: 400V 50 Hz tri-phase for high power utilities such as large motors, galley equipment, laundry, air conditioning system • Auxiliary power: 230 V 50 Hz mono-phase for small electric otors, electric appliances, lighting, etc. • Emergency power: 24 Volt DC for alarm system, navigation equipment, navigation lights and radio appliances. On board electrical power will be produced by 2 (two) generating plants each of nominal power of 80 kW. The emergency power source, for essential utilities (navigation lights; emergency lights) will be constituted by a storage battery together a battery charger. Quayside, the vessel will have the possibility to

be connected to shore power by a cable of 100A capacity and 20m length through an isolation transformer of 75 kVA capacity. Generating sets will be installed in the engine room and will be connected to the main switchboard. From the main switchboard, electrical power, will be distributed to the switchboards throughout the vessel. Each of them will have connection for 380 V and 220 V as necessary. Each distribution board as well as the main electrical switchboard will be equipped with two spare lines for 380 V and 220 V each. 24Volt DC current will be produced by a storage battery located in a technical area placed on the sundeck with own ventilation. Generators can be operated in parallel with automatic and manual synchronizing made.

- 2 sets of gel batteries (260 Ah. 24V each) for MM/EE starting.
- 2 sets of gel batteries (140 Ah 24V each) for DD/GG starting.
- 1 set of gel batteries (510 Ah 24V) for emergency and navigation lights
- 1 set of gel batteries (510 Ah 24V) for general service systems.
- 1 set of gel batteries (200 Ah 24V) for MM/EE electronic controls.

The sets of batteries for the main and auxiliary engines starting will be connected in parallel. With reference to the above battery sets, the vessel will be equipped with battery chargers of adequate capability as per the following:

- 1 battery charger of automatic type at 24V-75 A for MM/EE starting batteries and MM/EE batteries for electronic controls at 24V 50A
- 1 battery charger of automatic type at 24V-25 A for diesel generators starting batteries
- 1 battery charger of automatic type at 24V-50 A for emergency and navigation light batteries
- 1 battery charger of automatic type at 24V-75 A for general service batteries

Electronics and Navigational Equipment

- 1 x Magnetic compass with fluxgate
- 1 x Navigation data, speed eco log
- 1 x Echosounder with LCD colour monitor
- 1 x GPS system approved type
- 1 x GPS system connected to navigation system
- 1 x Autopilot connected to compass
- 1 x Radar X band, ARPA with 6 ft array with LCD colour monitor
- 1 x Chart plotter system with LCD colour monitor
- 1 x Radar X band with 4 ft X-ray
- 2 x Radiotelephone VHF with DSC complete
- 1 x Receiver NAVTEX
- 1 x Communication system INMARRSAT C
- 2 x portable VHF
- 1 x MINI- M voice and fax and data

Engine /Mechanical Equipment

Hull

The hull will be constructed with composite materials. The construction technology is based upon the most advanced technology for the production of fiberglass laminates and composite materials in industrial conditions. The materials and sizes of structural elements will be according to the requirements of the Classification Rules and the construction itself will take place under the surveillance of the Institute. Compliance with MCA requirements to be guaranteed. The design of the hull structure will ensure the continuity of the main elements contributing to the rigidity and robustness of the ship. All materials chosen for the vessel will be of a quality suitable

for the best possible construction of a yacht. The materials will be used according to recommendations of suppliers. Timber used for construction will be seasoned and without defect. The hull and the superstructure will be layered by hand in an open mould. The external skin layers will be laminated with vinyl ester resin, the internal layers will be laminated with poly ester resin. The formulation of the resin system (resin + additives) will satisfy the working time, viscosity levels and exothermic peaks of the laminates during the phase of polymerization, without compromising any of the mechanical characteristics of the laminate. Structural scantling of the vessel will be in accordance to Classification Society requirements. The reinforcements used for the stratification of the panels will be as follows: • Structural skins and panel material: ARAMAT 72K and MAT • Side sandwich core: 75 kg/m³ PVC (Polyvinylchloride) • Local reinforcement structural core: PVC high density or marine plywood • Interior structure material: ARAMAT 72K, GLASS E in the form of unidirectional fiber, biaxial +/-45°, 0/90° and matting. • Interior structure support: Low density P.E (Polyurethane expanse), apart from local reinforcements. The vessel is divided in five watertight compartments by four watertight bulkheads, as follows: • Garage • Engine room • Guest area • Crew quarter • Forepeak The bulkheads arrangement has been designed to meet the damage stability criteria in case of one compartment flooded. All tanks will be equipped with fill, suction and vent piping and manholes for inspection and maintenance.
